

SAFE WORK PLACE APPS

Make returning to the workplace safe for everyone

Provide your employees with a digital experience to return to work

Prepare for your return to the workplace with four apps specifically designed to enable workforce and workplace readiness:

- **Employee Readiness Surveys** - Gauge readiness to return to the workplace and determine how to make employees feel safe.
- **Employee Health Screening** - Screen employees before entering the workplace for compliance with entry requirements.
- **Workplace PPE Inventory Management** - Manage your PPE inventory across locations and facilities to meet the physical safety needs of your workforce.
- **Workplace Safety Management** - Create a safe, managed return process with distancing plans, shift assignments, and sanitation scheduling.

The apps are supported by a comprehensive Safe Workplace Dashboard to help you assess your ability to reopen, displaying data from all the Safe Workplace apps in one location.

Benefits provided by ServiceNow's Safe Workplace apps

Engage with employees to inform and listen to feedback:

- Proactively inform employees with targeted communications about returning to the workplace
- Gather employee feedback and take action with communications and process changes
- Provide easy access to information on health and safety when and where employees need it

Automate steps for returning to the workplace:

- Digitise processes for returning to work, including employee and workplace readiness
- Plan for and manage return to work across functions including scheduling, desk allocation and cleaning
- Guide new hires and returning workers through onboarding and other lifecycle events

Provide a safe, employee-ready working environment

- Manage planned and on-demand workplace arrangements and notify employees of assignments and arrival times
- Automate the scheduling of cleaning tasks to support the readiness and safe use of the workspace

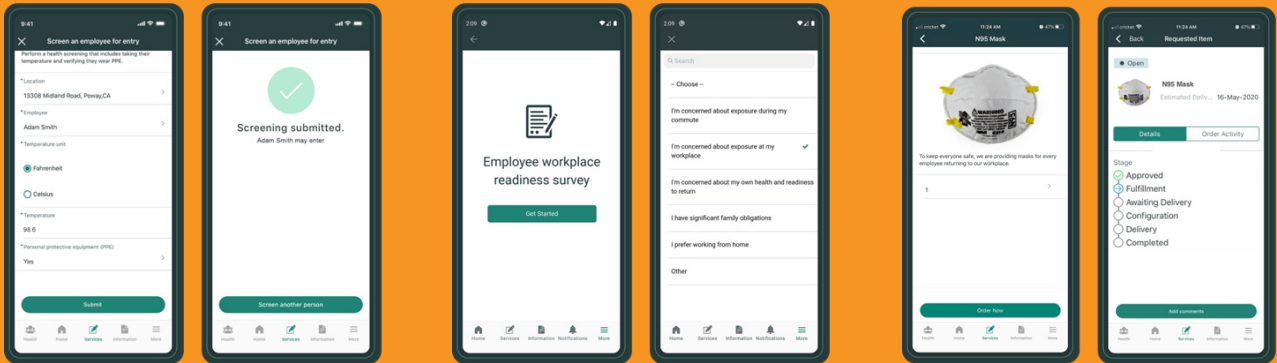

Implement Safe Workplace Apps with Enable Professional Services

SAFE WORKPLACE
